

Communication

Date	15 July 2026
Team ID	SWUID2026217449
Project Name	Rising Waters - Flood Prediction ML
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Self Notes / Progress Tracker	Sunil Teja Junjunuri	Daily self-check on task status and blockers
2	Progress Update	Weekly	Skill Wallet Kanban Board	Sunil Teja Junjunuri	Track weekly progress on model development and web app
3	Issue / Bug Discussion	As Needed	Self-debugging / Online Resources	Sunil Teja Junjunuri	Identify and resolve technical issues in code or dataset
4	Stakeholder Review	Bi-Weekly	Skill Wallet Platform	Sunil Teja Junjunuri, Mentor	Review project progress against milestones with mentor
5	Final Demo Rehearsal	Once	Self Rehearsal	Sunil Teja Junjunuri	Rehearse the final project demonstration before presentation
6			Personal Task List	Sunil Teja Junjunuri	Plan and track individual tasks across all epics

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Other team members were not able to contribute to the project	Took complete ownership and independently completed all epics from development to documentation
2	Dataset with matching features was not readily available	Generated a realistic weather dataset programmatically with the required features
3	Comparing multiple ML algorithms to find the best one	Trained Decision Tree, Random Forest, KNN, and XGBoost and selected Random Forest based on accuracy
