

Project Demo Planning

Date	15 July 2026
Team ID	SWUID2026217449
Project Name	Rising Waters - Flood Prediction ML
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Overview of flood prediction problem and project goal	3	Sunil Teja Junjunuri
2	Dataset & Preprocessing	Explain weather dataset, cleaning, and scaling	4	Sunil Teja Junjunuri
3	Model Building	Compare Decision Tree, Random Forest, KNN, XGBoost	5	Sunil Teja Junjunuri
4	Web App Demo	Live prediction demo using the Flask web interface	5	Sunil Teja Junjunuri
5	Scenario Walkthrough	Demonstrate High Risk and Low Risk prediction scenarios	3	Sunil Teja Junjunuri
6	Conclusion & Future Scope	Summary of outcomes and cloud deployment roadmap	2	Sunil Teja Junjunuri

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the flood problem and why early warning matters
2	Solution Overview	Describe the ML pipeline: preprocessing, model comparison, prediction logic
3	Live Feature Demonstration	Show real-time prediction via the Flask web app for sample weather inputs
4	Q&A Session	Address mentor/evaluator queries regarding the model and implementation
